VICTOR WAS THE FEATURE TODAY.

Sales Were Made as High as 38 | Several Feet of High Grade Silver on the Mining Exchange.

Uncle Sam Active at Better Figure-Ben Butler Firmer-Ajax Weaker.

Rusiness closed on the mining exchange today with the sale of 28,450 shares for \$14,683.37. Victor was the feature of the call, going from 321/2 to 28. Nearly 10,000 shares changed hands this morning between the above figures, and the stock closed strong. Carisa was also stronger, owing to new developments in the Northern Spy. It opened at \$1.55, but fell away to \$1.53 before the call closed. Con. Mercur let go 100 at \$2.40, while Ajax declined to \$1.34% after opening at \$1.38. was also much stronger this morning. Sales were made from \$3.16 up to \$3.35. Eagle and Blue Bell let go 100 at \$1.00, while Lower Mammoth released 100 shares at \$2.55. Uncle Sam was stronger, selling from \$1.82 up to \$1.86. Ben Butler was also in good condition. Over 6,000 shares changed hands between 161/2 and 16%. Boss Tweed was traded in at 46% while 500 Joe Bowers went at 71/4. Tesora weakened to 69. May Day hung around \$1.411/2, while Ingot was active at 24. Manhattan was stronger at 11/2. Sacramento sold

at 23. The closing figures were as follows: Bid. Asked. Stocks. Ajax 1.361/4 1.361/9 45 16% 2.50 1.52 Carisa 1.50

NEW STRIKE IN THE OPHIR MINE.

Ore Found on the 200 Level.

CARISA WAS ALSO STRONGER | SUNSHINE DEVELOPMENTS.

Manager Moore Answers a Vew Questions - Examining Ben Butler-Century Looking Well.

Manager F. H. Lathrop of the Ophir Mining company returned this morning from Stateline with Joe Dederichs, after inspecting the mill and mine. Mr. Lathrop brought to town a number of fine samples of ore from a new strike on the 200 level. He is very much pleased with it because it proves the continuity of the richest ore chute in the mine from the surface to the 400 level. The strike was made a couple of days ago and the ore is similar to the rich ore exposed in the It afterwards sold up to \$1.35%. Daiy other levels. When Mr.Lathrop left the mine, the ore body was about 6 feet wide, and it looks as if further developments will be as important as those in the other levels, where a magnificent ore chute has been opened up.

The mill is progressing satisfactorily, though a serious delay is being experienced in securing the roaster and dryers. The 320-horse power boilers are in place and the foundation has been set for the rolls. The building is all up and the elevators and screens fare in place. The big 9-drill com-pressor is to be shipped from Chicago next week. next week. A fine flow of water has been developed some distance from the mine, and it will be necessary to pump the water 600 feet higher than the station. The boiler and pump are already in place, with which to force the stream 3,500 feet. The conditions at the mine are, as a whole, considered very flattering by the management.

AT THE SUNSHINE.

Five Feet of Drifting on the 400

Level Does Not Disclose Ore Body. George C. Moore, who has charge of the development work being done at the Sunshine Mining company's property, reports a force of eleven men still en-gaged in drifting on the different levels. The best showing has been made in the 200 and 300 levels of the mine, where some good milling ore is/being drifted on. Mr. Moore says the developments on. Mr. Moore says the developments thus tar have not been as good as he expected for the reason that no ore has been found on the 400 and 500 levels. Notwithstanding the fact that about 500 feet of drifing has been done on the 400 nothing more than a trace of gold has been disclosed by the assays. The mili is being put in shape for the treatment of the ores now exposed on the 200 and 300 levels, the object being to make the mine pay the costs of further pros-pecting, if possible. The mili will probably be started up about Nov. 15th, and it is stated that if the ore does not cover expenses of prospecting the mine the property will probably be relin-quished.

EXAMINES BEN BUTLER. Professor Palmer Well Pleased With Condition of the Mine.

Prof. O. A. Palmer, the well known mining expert returned to the city last evening, after spending several days examining the Ben Butler property at Bingham. Mr. Palmer stated today that while his examination was not completed he considered the prospect of the Ben Butler making a good mine very encouraging. It is stated that the professor visited the property for the purpose of gathering information that will be of use in a suit that may be brought against the Liberal owners involving the question of apex. Mr. Palmer was not prepared to say anything further regarding this matter today than that there is every probability that the ore body in the lower tunnel will be found connecting with the streak of ore ex-posed in the upper tunnel, several hundred feet nearer the surface. The property is said to be looking very good but the professor expects to become more enlightened on several points when he goes over the ground again next week.

Arrives from the Century.

Alma Tanner, who has just come down from the Century mine at Park Valley, reports the property in the very best condition. The mine never looked as well as it does today in spite of the fact that the big ore chute has not been cut in the lower tunnel. The tunnel has crosscut the vein and drifting has been started towards the ore chute is exposed in the upper tunnel, it evidently lies south of the crosscut. No doubt whatever is felt that the same chute of ore will tapped on the lower drift very rtly. Meantime preparations are shortly. being made to start up the new min in a few days. Dr. White expects to leave next week for the mine. Regarding the indebtedness the doctor said today that within one menth the mill should pay off all the debts of the company on account of the construction of the mill.

A Big Tunnel Project.

A new mining era has begun in the Leadville, Colo., district, based upon milling and tunnelling enterprises, says an exchange. As to the tunneling projects several are under way now, the main one being the great Yak, which is in almost 10,000 feet and has proven the great advantage of such projects not only in handling ore at a smaller cost to the producer, but in showing the character of the different formations penetrated. Even at this early date numerous claims lying adjacent to the Yak tunnel are being operated through that channel, but the fact that the company has so much territory along its route goes to prove that when it is ready it will develop an enormous ter-ritory. Well informed mining men are of the opinion that the most successful way to explore the depths of Prospect mountain is to run a tunnel through it from the Birdseye side.

MINING NOTES.

The May Day of Tintic will market three cars of ore tomorrow.

Capt. Duncan McVichie went out to

The Ben Butler of Bingham reached lor. 21 south, West Temple street.

Lisends are invited to atlant. The remains will be shipped to Spanish Fork and Pennsylvania, 18420; western candled, 17415; western uncandled, 14417. The Ben Butler of Bingham reached the market today with four cars of ore.

stalled in the Tesora mill. The mili is said to be doing better work. The Tiewaukee of Bingham reached he market today with a car of concen-

The Morning Star group at Bingham has been bonded to M. L. Effinger, L. A. Jeffs and Joe Dederichs.

A car of crude ore and one of con centrates were on the market today from the Columbia of Bingham .

Sam Levy left for Tintic last evening o look over the Boss Tweed with the view of starting operations at once. A car of Humbug ore was sampled today for the Uncle Sam company, making five cars on the market this

The Taylor-Brunton sampler reported sixteen cars of ore from Tintic, seven from Bingham, and three from Frisco

Arthur Buckbec, manager of the Virtue Con. Mining company of Baker City, came down from camp last night on a visit to his family.

Secretary Wilkinson of the Mammoth was engaged today on the August payroyy, which includes 314 men. It will be paid on the 20th inst.

A small force has been started to work preparing to drive a tunnel on the Plutus company's property, located near the Mammoth in Tintic. The Carisa shipments are running

from 8 to 27 per cent copper, with as high as 10 ounces silver and from .40 to over 2 ounces gold per ton. Hereafter the floor of the Mining Exchange will be in charge of a com-mittee who will see that no members

are represented on the floor by more than one person. Before a seat on the Mining Exchange is transferred it will be necessary here-after for ten days' notice to be given so that protests may be made, if there

are any. Supt. Underwood of the Carisa came in from Tintic last evening with news of a good strike above the 900 level of the Northern Spy. The ore is said to be two feet wide and of very good grade.

A large stratum of magnesian lime has been encountered in the R. G. W. group at Tintic, which is considered by R. G. Wilson to be the forerunner of ore in that part of Tintic.

Two men are engaged at the Coppe Ranch property near Milford, in clean-ing up and repairing the 100-foot ver-tical shaft. Manager Lloyd says de-velopment work will be started this

The rich lot of ore from the Mammoth, about which a dispute has arisen with the Smelter company, was re-sampled again yesterday by the Smelter company. The first assays showed the presence of nearly \$140 gold and over \$70 silver per ton. The lot consists of three cars.

The Red Ridge Oil company filed ar-The Red Ridge Oil company filed articles of incorporation yesterday aftermoon in the office of the county clerk. The capital stock is placed at 590,000 shares of the par value of 10 cents a share. E. V. Higgins is president of the company; E. W. Clark, vice president; S. L. Hague, secretary, and Frank R. Ball, treasurer. The company owns 1,560 acres of oil lands in Juab county

Supt. Nebeker of the Ajax telephoned to the office last evening that he is going to start raising on the ore chute at once. In the "News" report yesterday it was not intended to convey the impression that the ore had pinched out. It had pinched or was much narrower in the face of the drift though it is said have looked good in the top and

THE FARMERS' INSTITUTE.

Work of the Agricultural College Carried to the Homes of the People.

How Meetings May be Arranged For -Director J. A. Widtsoe Chairman of Committee-Institute Annuals.

The laws of the state provide that the Agricultural College shall hold Farmer's Institutes in various parts of the state each year, and funds are provided to meet the expenses of such meetings. This permits the officers of the college to carry the special work of the institution to the homes of the people and thus give instruction to those who could not possibly come to the college. In addition to the college officers experts in various lines of agriculture are engaged to add to the interest and value of those meetings. The arrangement of this work is placed in charge of a committee of which Director J. A. Widtsoe is chairman. During the past year institute meetings have been held in thirty to thirty-

five towns of the state. Any community that desires a Farmr's Institute meeting during the coming year should send a request to the chairman of the committee as early as possible; preference is given to those localities which will take the greatest interest in working up the meeting.

To give a wider distribution to the work of the Farmers' Institutes there is issued each year an annual embody-ing a selection of the leading papers and addresses given during the year. Four of those annuals have been issued. some of which yet remain on hand, and can be had on application to the ollege. The annual is of about one hundred to one hundred and twenty pages reading matter and is sent free to all residents of the state on request.

MOST STOCKS DECLINED.

Prices Showed Little or No Change at Opening, No Special Pressure Developing.

Unexpected Demand for Usually Dormant Stocks Sent Some of Them Up Several Points.

New York, Sept. 12.-Wall street Prices of many stocks showed no change in the opening quotations, and none of the leading stocks changed as much as a half point. Chicago, Indianapolis & Louisville, Denver & Rio Grande, New York, Chicago & St. Louis econd preferred, and American Ice rose from 1 to 14.

No decided pressure developed anywhere. Room traders bid up the active favorites. Shorts bought moderately on the up grade and advances approximating a point were made by St. Paul, Atchison, Union Pacific, Missouri Pacific, Mexican National, Brooklyn Transit and Manhattan. Business was quiet and prices below the best.

A demand arose for numerous usually dormant stock sand there were advances of 1 tto 31/4 points above the preceding price in several securities. Their strength caused only a temporary check to the decline among the leaders, and when St. Paul, Atchison and Amalgamated Copper were marked down 1@1%, other prominent stocks reacted to the lowest. A rally of 1% in St. Paul steadied the market. A feature of the dealings was the sale of 100 shares of Northern Pacific 12214. The last regular sale was at 118, on July

A selling movement in St. Paul found little support for the stock and the little support for the stock and the price fell rapidly to 141%, a decline of 3½ from the best price of the morning. All other stocks extended their declines, but the most prominent raliroads ruled only slightly below yesterday's close. General Electric lost 3 points, Lackawanna 5 and Sugar, Copper and Steal stocks were supported. per and Steel stocks were all very weak. Buying to cover advanced St. Paul 2 points, but the general market ralled only a small fraction. Bonds were firm.

An Excellent Combination.

The pleasant method and beneficial effects of the well known remedy, SYRUP OF Figs, manufactured by the CALIFORNIA Fig SYRUP Co., illustrate the value of obtaining the liquid laxative principles of plants known to be medicinally laxative and presenting them in the form most refreshing to the taste and acceptable to the system. It is the one perfect strengthening laxative, cleansing the system effectually, dispelling colds, headaches and fevers gently yet promptly and enabling one to overcome habitual constipation permanently. Its perfect freedom from every objectionable quality and sub-stance, and its acting on the kidneys, liver and bowels, without weakening or irritating them, make it the ideal

laxative. In the process of manufacturing figs are used, as they are pleasant to the taste, but the medicinal qualities of the remedy are obtained from senna and other aromatic plants, by a method known to the California Fig Syrup Co. only. In order to get its beneficial effects and to avoid imitations, please remember the full name of the Company printed on the front of every package.

Lewis' 98 % Lye, Powdered and Perfumed. (PATENTED.)

The strongest and purest made. Unlike other Lyes, it is finely powdered, packed in a can having two iids, one easily cut and the other removable for constant use. It will make the best Perfumed Hard Soap in 20 minutes without boiling. It is the best for cleansing waste pipes, disinfecting sinks, closets, cleaning paints, bottles, barries; washing trees and killing insects; for engineers and machinists' uses; for painters, to remove old paints, etc.

A SALT M'FG, CO. (PATENTED.)
